PROJECT EXPERIENCE

DnDEZ

Software Development Class

Link: <https://github.com/Mperez5891/Group-A-DnD-Companion>

- DnD made easy! This project is designed to be a companion web app for Dungeons and Dragons 5E.
- Built using Python (Flask), HTML, CSS, and JavaScript. We used Sqlite3 for the Database.
- Key Features: Map generator using procedural generation, character creator, and music player.

MocroBlog

Back End Development Class

Link: https://github.com/Mperez5891/CSPS449_Projects/tree/main/Project7

- This project is the backend to a Twitter like application that can handle multiple posts from multiple users and is attached to a relational Database.
- Created using Python and Foreman was used as a systems management tool. Created as a REST API. Learned to build a load balancer and utilize message queuing (using Redis Queue) and asynchronous posting.

Stoopneggle

Front End Development Class
